

Vertiv™ NetSure™ 701/700 NCU Retrofit

Benefits

- Extend the useful life of your power system by modernizing your control and monitoring setup.
- Retrofit your power plant live without service interruption, keeping rectifiers and distribution intact during installation.
- Keep your network secure with advanced security features including HTTPS/SSL, complex login credentials, or Radius user authentication.
- Connect to a diverse array of network types including IPv4, IPv6, SNMP V2c and V3, Modbus, TL1 with multi-browser compatibility.
- Get up and running quickly with intuitive graphical interface and enhanced monitoring and control options.
- Upgrade both your main control bay and supporting supplemental bays.

Upgrade aging controls in legacy NetSure 701 and 700 systems without service disruption, adding a modernized local/remote interface with enhanced security features.

Description

The Vertiv™ NetSure™ 701/700 NCU Retrofit kit provides an advanced upgrade for legacy NetSure plants to the NCU control unit and associated features and options. All power (rectifiers) and distribution remains intact, allowing for installation on a live system without service disruption. Existing connections are re-purposed to minimize installation complexity.

Kits are available for both the main bay and supplemental bay. The main bay accepts the NCU controller (ordered separately) with either the standard configuration or custom configuration upon request.

Once updated, the NetSure 701/700 system will have all the features of the current models (NetSure 7100 and NetSure 710) including compatibility with the latest monitoring options and supervisory modules. The NetSure 701 can be expanded with a NetSure 7100 supplemental bay as needed.

Ordering Information

Part No.	Description
60124057	Vertiv NetSure 701/700 NCU Retrofit Kit, Main Bay
60135833	Vertiv NetSure 701 NCU Retrofit Kit, Supplemental Bay
