

# Every data center IT manager knows,

IT is just one big transition!

Vertiv<sup>™</sup> Avocent<sup>®</sup> DSView<sup>™</sup> 4.5 software has been a vital element of IT management many years. The team at Vertiv has introduced a new platform to continue that work – Vertiv<sup>™</sup> Avocent<sup>®</sup> DSView<sup>®</sup> Solution.

### What makes it better?

DSView  ${}^{\rm M}$  Solution provides much of the same functionality as DSView  ${}^{\rm M}$  4.5.

- Launch remote KVM and serial console sessions
- Manage remote access appliances such as KVM switches and serial console, as well as Service Processor Management

However, DSView Solution provides expanded IT and Infrastructure management and automation via a refreshed HTML5 user interface.

### Deployment

DSView Solution is deployed in a slightly different way than DSView 4.5. There is not an installer application for a specific Operation System (Windows or Linux). Instead, it can be deployed as:

- A pre-loaded, ready-to-install appliance
- A virtual appliance within your own infrastructure

## **Ordering details**

| Deployment model   | Product SKU       |  |  |  |  |
|--------------------|-------------------|--|--|--|--|
| Hardware Appliance | ADX-MP1000DAC-400 |  |  |  |  |
| Virtual Appliance  | ADX-MP1000VA      |  |  |  |  |

Vertiv<sup>™</sup> Avocent<sup>®</sup> DSView<sup>™</sup> Customers - Are you ready for better?

# Special incentives are available for current DSView 4.5 customers.
